SSH Copy

Author: Jerry Chae

This plugin performs the SCP command in Open SSH environment.

⚠ IMPORTANT NOTE

The plugin functions in all environments that are compatible to the Open SSH standard regardless of platform such as Linux, Windows, or Mac. If the plugin does not work, check compatibility to the Open SSH standard.

★ Functions

1. **Get** function copies remote file(s) and folder(s) to local storage.
2. **Put** function copies local file(s) and folder(s) to remote storage.

How to set parameters

The screenshot shows the configuration interface for the SSH Copy plugin. The 'Plugin' dropdown is set to 'SSH Copy'. The 'Operation name' is 'Operation 1' and the 'Plugin version' is '2.412.2130'. The 'Properties' section includes fields for 'SSH Host', 'SSH User', 'Operation' (a dropdown menu), 'Remote File/Fol...', and 'Local File/Folder'. There are checkboxes for 'Password', 'Advanced', 'Port' (set to 22), 'SSH keyfile', 'Recursive', and 'Preserve Times'. The 'Return value' and 'Result type' are also visible. Yellow callout boxes provide instructions: 'Specify SSH Host here.' points to the SSH Host field; 'Choose either [Get] or [Put].' points to the Operation dropdown; 'Specify file-path for the local system/storage.' points to the Local File/Folder field; 'When checked all files/folders inside the folder will be copied.' points to the Recursive checkbox; 'Specify SSH User ID here.' points to the SSH User field; 'Specify file-path for the remote system/storage.' points to the Remote File/Fol... field; 'Enter password of SSH if needed.' points to the Password checkbox; 'Specify port number if it is different from default 22.' points to the Port field; 'SSH keyfile may be needed instead of password.' points to the SSH keyfile checkbox; and 'When checked original timestamp on files will be preserved.' points to the Preserve Times checkbox.

Text from Image

Return Value

The plugin always returns full file-path of the local file.
