

Solution Tour and Partner Training Plans

Solution Tour and Introduction to the Digital Worker administration platform

Time Schedule

- **This is a paid training course**
- Anyone can receive this training. (Resellers receive discounts)
- Schedule can be flexible but reserving 5 consecutive days is preferred
- No limits in number of participants but up to 6 will ensure productive and interactive training
- One day schedule will look like this
 - a. 60 min x 2 in the morning
 - b. lunch break
 - c. 90 min x 1 in the afternoon
 - d. Up to 60 min for recap, discussions, and questions

 **NOTE:** The training will be given online via Zoom - Please make sure participants can view both the Instructor's screen and their own screen simultaneously.

Agenda

Date	Topic	Contents
Day 1	1) Getting Started	<ul style="list-style-type: none">a. Components, architecture, and terminologies<ul style="list-style-type: none">• https://www.argos-labs.com/argos-rpa/b. General Workflow<ul style="list-style-type: none">• ARGOS Low-code account sub-account structurec. Account structure and RBAC<ul style="list-style-type: none">• Enterprise Supervisor Sub Accounts and RBACd. Hardware Software requirements<ul style="list-style-type: none">• https://www.argos-labs.com/h-w-s-w-requirements/e. Downloading the tools (STU and PAM)<ul style="list-style-type: none">• https://www.argos-labs.com/#downloadf. Installation and Sign Up<ul style="list-style-type: none">• If you have used your email previously for another ARGOS account<ol style="list-style-type: none">1. Our SV/STU account supports the "email plus(+)" sign" scheme when you want to use an email address which has been already used at any other accounts.2. For example, new registration with example+2@argos-labs.com is possible after example@argos-labs.com has been used to register an account already.The correspondences will go to the correct address3. (More here: https://gmail.googleblog.com/2008/03/2-hidden-ways-to-get-more-from-your.html)g. Logging onto Supervisorh. Switching on the Plugins

	2) STU Overview and Support Resources	<p>a. Key Sections from the STU screen</p> <ul style="list-style-type: none"> • Main Menu • Scenario information • Time Out • Steps and Functions • Variable • Toolbox (how to customize) • Timeline • Parameter section <p>b. Where to get help</p> <ul style="list-style-type: none"> • FAQ from STU (You can access FAQ from our website too) <ol style="list-style-type: none"> 1. https://wiki.argos-labs.com/display/JPARELNOTE/FAQ • Keyword search <ol style="list-style-type: none"> 1. FAQ 2. Toolbox 	<ul style="list-style-type: none"> • STU links to help <ol style="list-style-type: none"> 1. The [HELP] tab <ol style="list-style-type: none"> a. Benny's page for Variables b. FAQ access c. tech@argos-labs.com i. 24-hour email support • Help for specific Operations <ol style="list-style-type: none"> a. The Question Mark buttons • The Learn More links <ol style="list-style-type: none"> a. Variable b. Return Value • Tutorial Materials/Videos <ol style="list-style-type: none"> 1. 90 min Rocket Start videos <ol style="list-style-type: none"> a. https://www.argos-labs.com/rocket-start/ • How to "UNDO" while editing your scenario
	3) PAM Settings and Registration	<p>a. Test your PAM</p> <p>b. Check to see if Supervisor sees your PAM</p>	
	4) The First Bot	<p>a. How operations connect with each other</p> <p>b. How ARGOS Low-code variables work</p> <p>c. Auto Rec</p> <p>d. Manual Bot Development</p>	<p>e. Combining Manual Development and Auto Rec</p> <p>f. Test locally with your PAM</p> <p>h. Execution result at Supervisor</p>
Day 2	5-1) Various Automation Capabilities	<p>a. Bot navigation schemes</p> <ol style="list-style-type: none"> i. API driven ii. Code/Object driven <ol style="list-style-type: none"> 1. HTML 2. JavaScript 3. Python 4. PowerShell 5. Run Program 6. Window object iii. Properties/Windows metadata iv. Shortcut Keys v. Image Processing/GUI base 	<p>b. Triggering the bot execution based on events</p> <ul style="list-style-type: none"> • By monitoring email inbox • By monitoring a folder • Kick-starting from another bot <p>c. Calling functions</p> <p>d. Operating major business apps</p> <ul style="list-style-type: none"> • MS Excel • MS Word • Adobe PDF
Day 3	5-2) Various Automation Capabilities	<p>e. Web application</p> <ol style="list-style-type: none"> i. Data entry ii. Data extraction – Webscraping <ol style="list-style-type: none"> 1. Open Browser 2. Python Selenium 3. Other plugins <p>f. Files and folders</p> <p>g. Sending emails</p> <p>h. Repeat processes – setting up loops</p>	<p>i. AI base tools</p> <ul style="list-style-type: none"> • OCR • NLP • Others - Translate <p>j. Data Science tools</p> <ul style="list-style-type: none"> • Large data processing (pandas) • Pandas profiling • Regression/Prediction • Presentation tools
Day 4	6) Deployment	<p>a. ebot</p> <p>b. On-demand remote execution</p> <p>c. Scheduled execution</p> <p>d. API</p>	
	7) Stability and Robustness	<p>a. Windows focus/Active application</p> <p>b. Verification operations</p> <p>c. App performance/Resource release and use of delays</p> <p>d. Retry loop implementation and in-bot error notification</p> <p>e. Try catch should be in Stability and Robustness</p>	
	8) Troubleshooting	<p>a. Tips - where to look first</p> <p>b. Supervisor execution results</p> <p>c. Supervisor Reporting/Notification features</p> <p>d. How to add helpful built-in execution logs into bots</p> <p>e. How to isolate the problem (view variables and step by step execution)</p> <p>f. Real data vs visible data</p>	
Day 5	9) POT SDK – building your own Plugin /Operations	<p>This section is OPTIONAL</p> <p>You will build your own Plugins/Operations. This part requires Python coding experience (or any other programming experiences)</p> <p>Instead of POT SDK you can use Day-5 to build a pilot bot (POC) together.</p>
