**Technical** contact to tech@argos-labs.com

⚠ **Important Notifications**

- **THIS TOOL REQUIRES HTML KNOWLEDGE.**
- It closes and kills all Chrome windows and processes when executed.
- It opens Chrome by default.
- It automatically closes Chrome when the bot execution is done. this is a feature to prevent leaving the browser open for the next execution.
(We are designing leave-it-open feature)

May you search all operations,

- **Verifications**
- **System Calls**
- **Interactives**
- **Plugins**

- It is always recommended to use, **Run > Open Browser > Chrome menu** so that the browser stays open while you build your bot.

- Default screen size is 1280 x 720

- Browser will be closed automatically when the bot has been finished.

Open Browser automatically **CLOSES** the browser when the bot execution has been done. This is a feature to prevent leaving it open for the next execution.

No need for screenshot.

Specify URL here.

Specify window size here.

All Chrome windows and processes will be closed and killed completely!
