Must **REPLY** to an email in automation? [Click here for how to set up a reply email](#).

How to register [default SMTP settings](#) with your STU.

1. Go to main menu, select Settings, and then click SMTP.

2. Enter your default SMTP information and click SAVE.

SMTP

Setting for SMTP

Host	smtp.gmail.com
Port	587 ☒ SSL
ID	support@argos-service.com
Password	*****
Mail Address	support@argos-service.com

How to set parameters

The screenshot shows a configuration window for a 'SendEmail' action. It includes fields for 'Operation name' (Operation 2), 'Delay' (0.5 Sec), and a 'Properties' section. The 'Properties' section has two sub-sections: 'Setting for Smtp' and 'Email Info'. The 'Setting for Smtp' section contains fields for 'SMTP Host' (smtp.gmail.com), 'SMTP Port' (587), a checked 'SSL' checkbox, 'ID' (support@argos-service.com), 'Password' (masked with asterisks), and 'Mail Address' (support@argos-service.com). The 'Email Info' section contains fields for 'To' (ssato@argos-labs.com), 'CC', 'BCC', 'Attach', 'Subject' (Email from PAM), and a large text area for the email body containing 'Hello World.' and '- PAM'. A yellow callout bubble points to the 'Setting for Smtp' section with the text 'Your SMTP information here.' Another yellow callout bubble points to the 'To' field with the text 'Enter recipient(s) information here.'

Action: SendEmail ?

Operation name: Operation 2

Delay: 0.5 Sec
